01

PROBLEM

Maintenance of Vehicles

Due to busy lifestyle maintenance of vehicle is often neglected

Low Efficiency of Older Vehicles

Due to neglected maintenance and services

Uncomfortable Drive in Older Vehicles

The drive becomes uncomfortable and you wish to buy new vehicle

3.8 Billion

Total Smartphone Users by 2021

8 Years

Average age of a consumer car

1.4 B

Total number of cars on the road

Our Idea

An app which is car's personal manager and takes care of servicing, replacement, and payments related to your vehicle with some cool features like part rating through Machine Learning and Modification Prelook through Augmented Reality

THE FUNCTIONING OF THE APP

What our app consists of ?

04

THE ML MODEL

Rates the quality of the car's parts and help to decide what to do with them

SMART REMINDERS

Remind the need for service and take care of all the bill payments

What our app consists of ?

05

THE AR ASSESSMENT

Shows how different modifications like color change, wheel alloys, etc. will look

RFID TAG

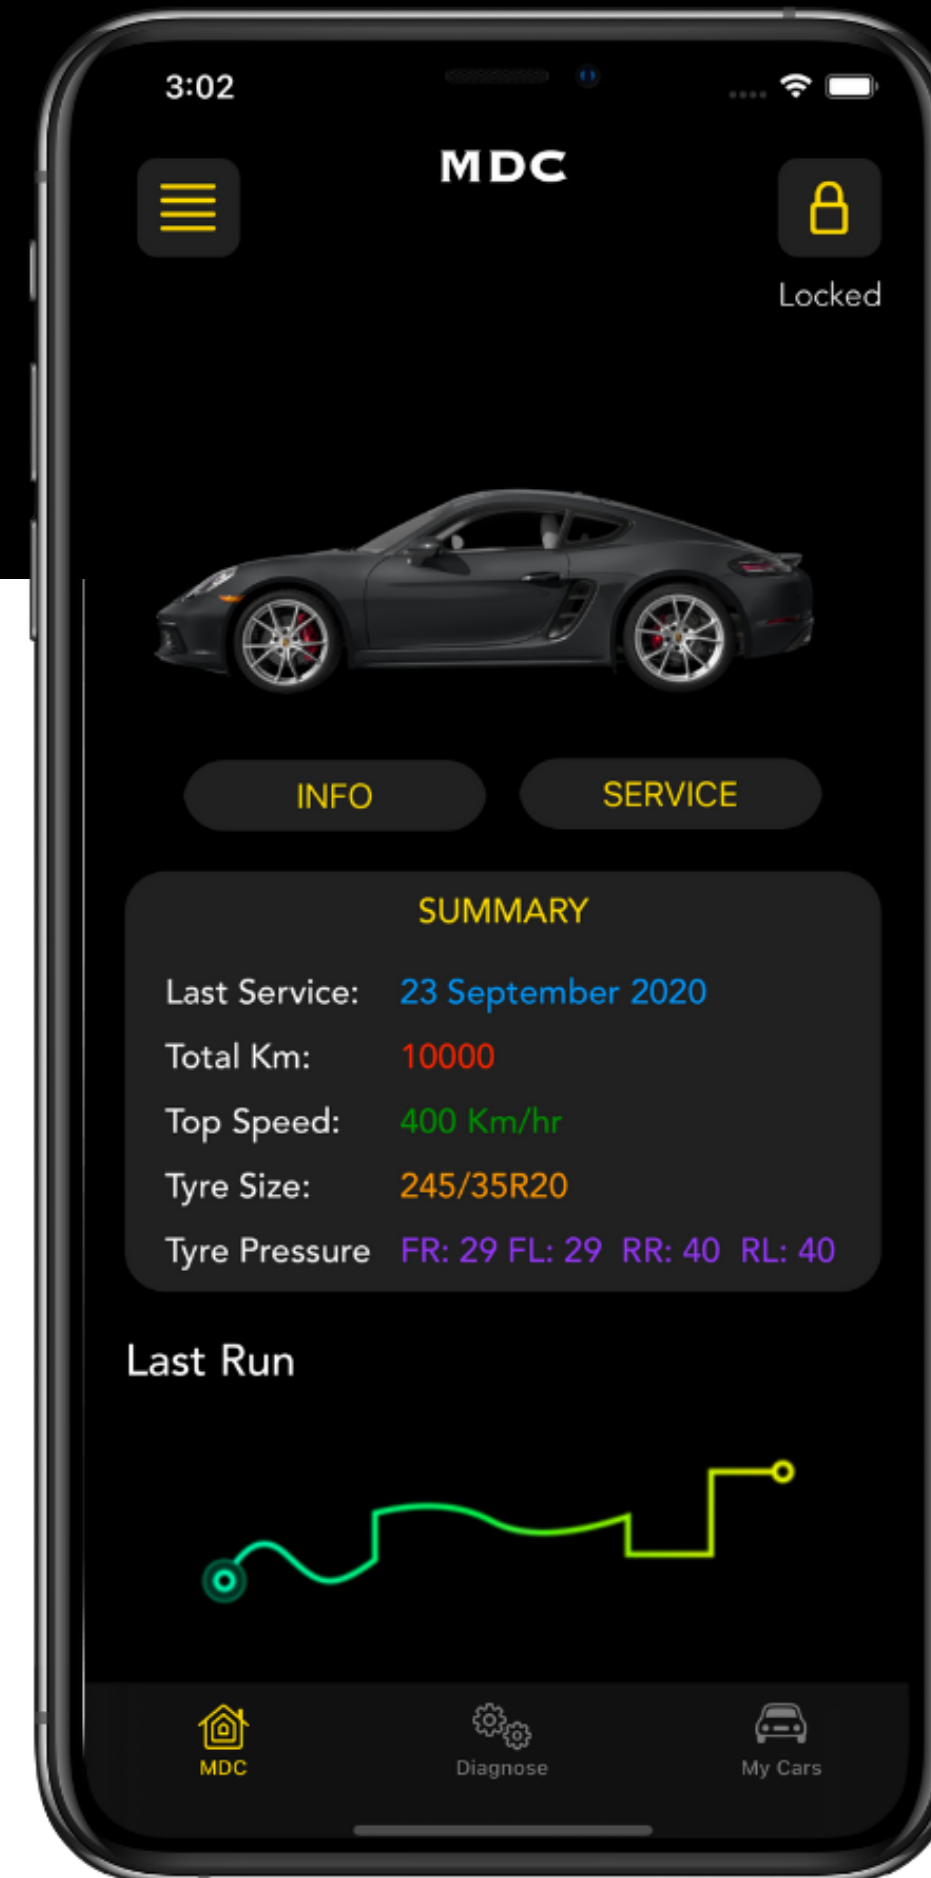

Will inform the service station about defects, previous services, etc which will help make the service better.

06

MDC Home Page

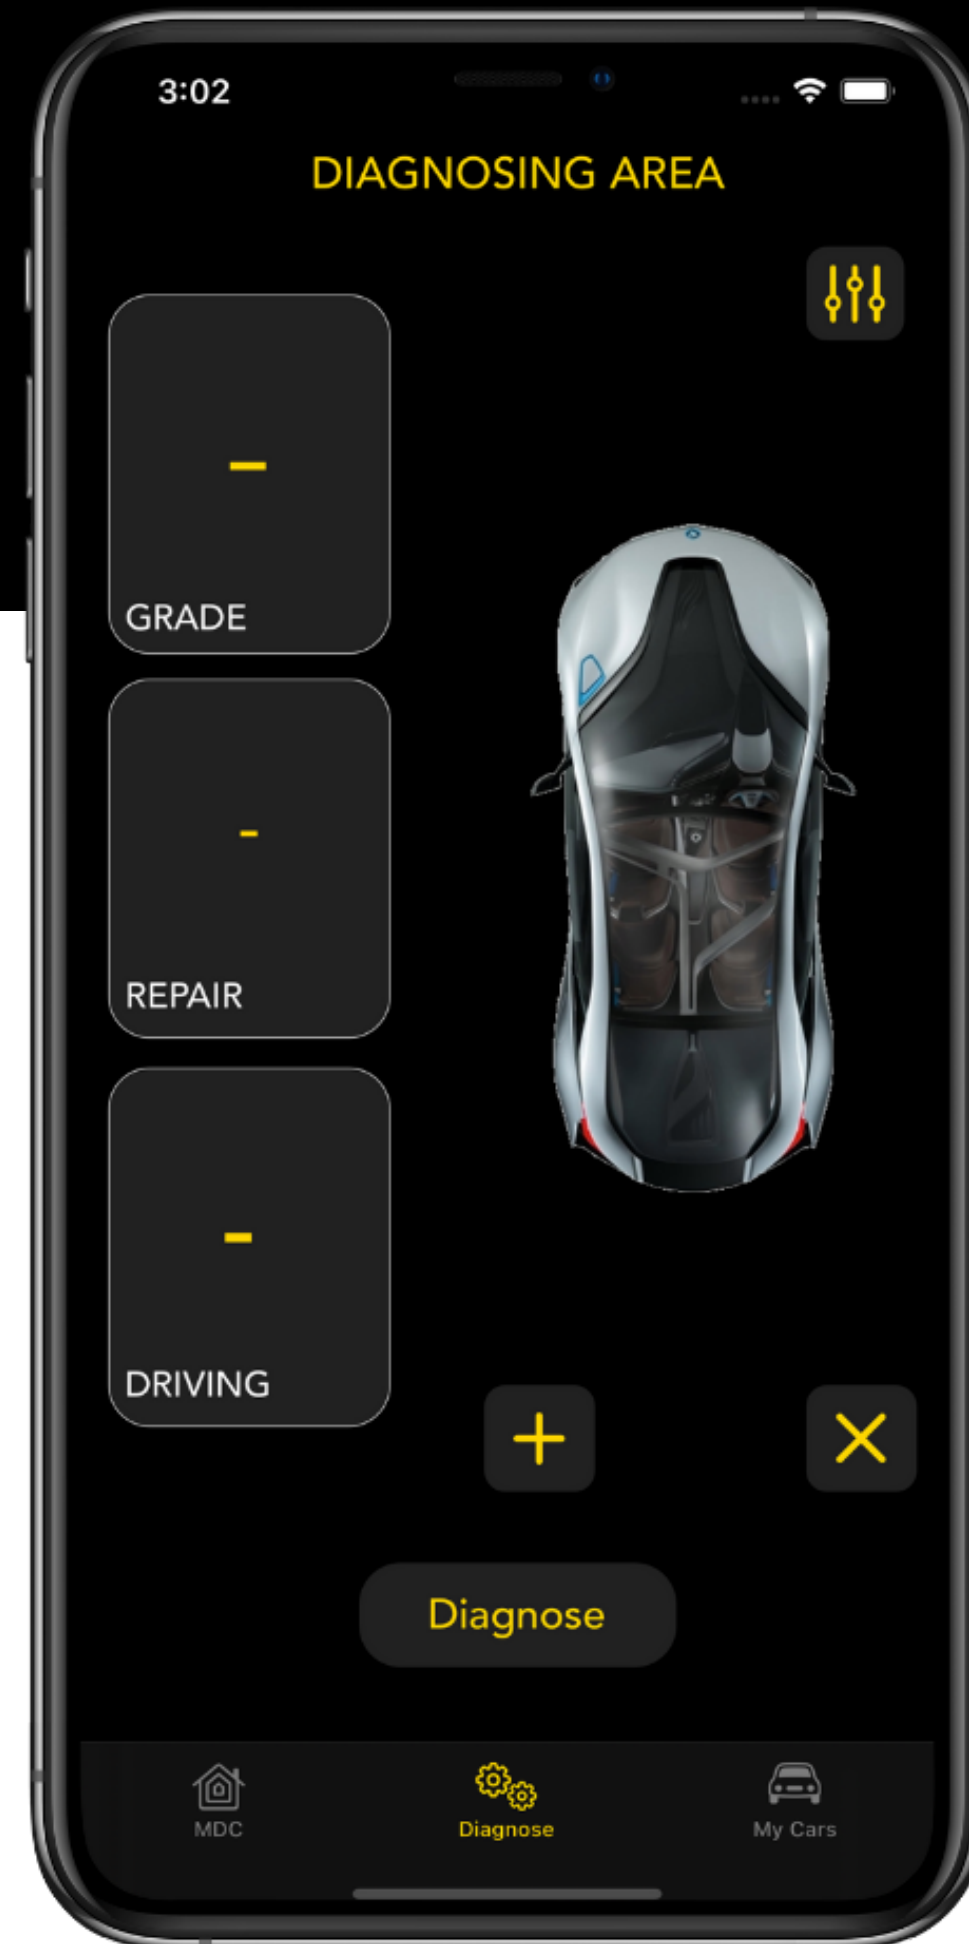

Shows basic info like Last Service, Total km, Top Speed, Tyre Size, Tyre Pressure and Last Run

07

Diagnosing Area

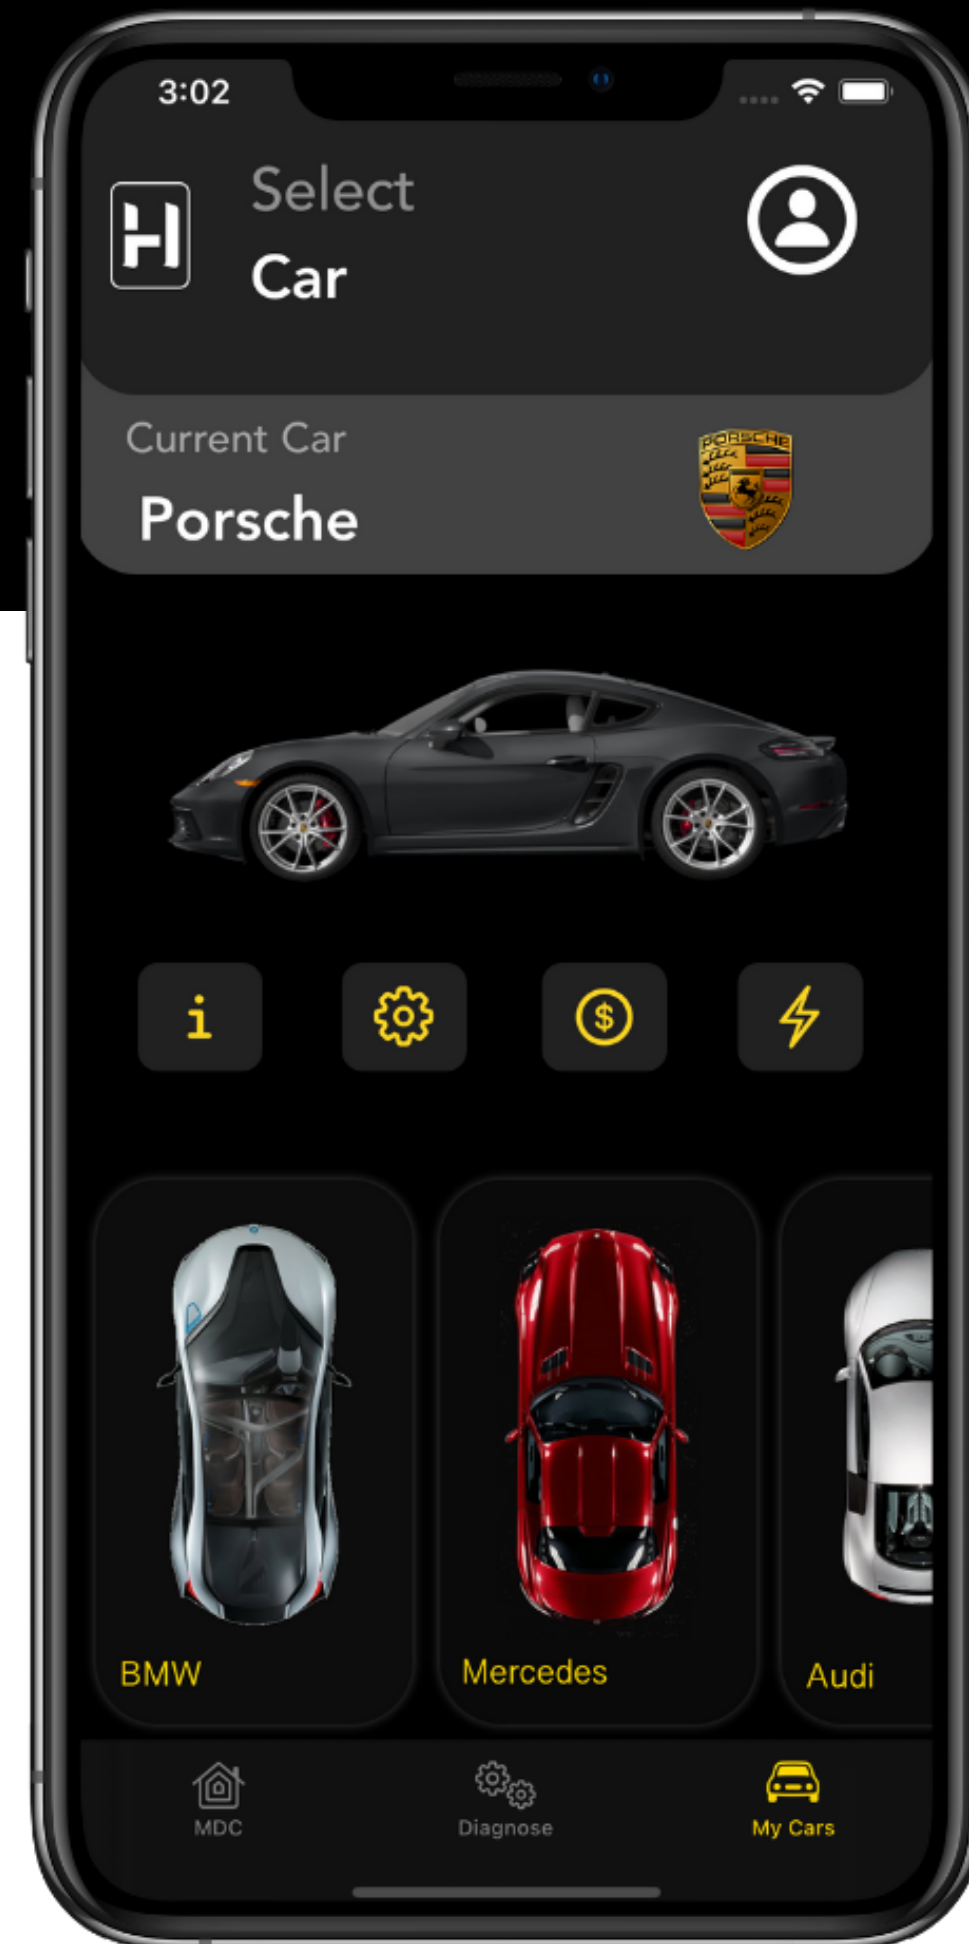

Shows information of previous diagnosis and the plus button helps to diagnose about a new part

08

My Cars

Enables users to select a car or to add a new one to their virtual garage

MAINTAIN QUALITY OF PARTS

Helps maintain your car parts through diagnosis and other stuff

NEVER FORGET DUE SERVICES

Smart Reminders notifies you about due services and even helps to book them

INCREASE THE EFFICIENCY OF CAR

Helps your car to be as good as a new one

SAFE AND COMFORTABLE RIDE

Enjoy your long trips without any stress over your car issues

Competitive Advantages
